¿ Did NG-112 already made its way into PSAP's?

Gregor Jänin, ENP

EENA 112 Operations Committee

Introduction

The true purpose of NG 112/911 is to establish a common interoperable platform that supports IP communications independent of specific networks, devices and physical locations

NENA , Emergency Communications Professional magazine , March 2010

european emergency number association

Demand of PSAPs

- Virtual PSAP
- Connected via IP
- Redundant failsafe operations
- VoIP Telephony Service
- Telephony integration
- CCTV /Video integration
- Text / IM support → Unified Communications

- search for services offered, local/global
- additional Information about caller

european emergency number association

We are already on the way

- ✓ every PSAP is already started into ng-112 by
 - having an IP-network
 - using VPN and secured Internet
 - using VoIP inhouse
 - provider using IP
 - location Query
 - Service Databases

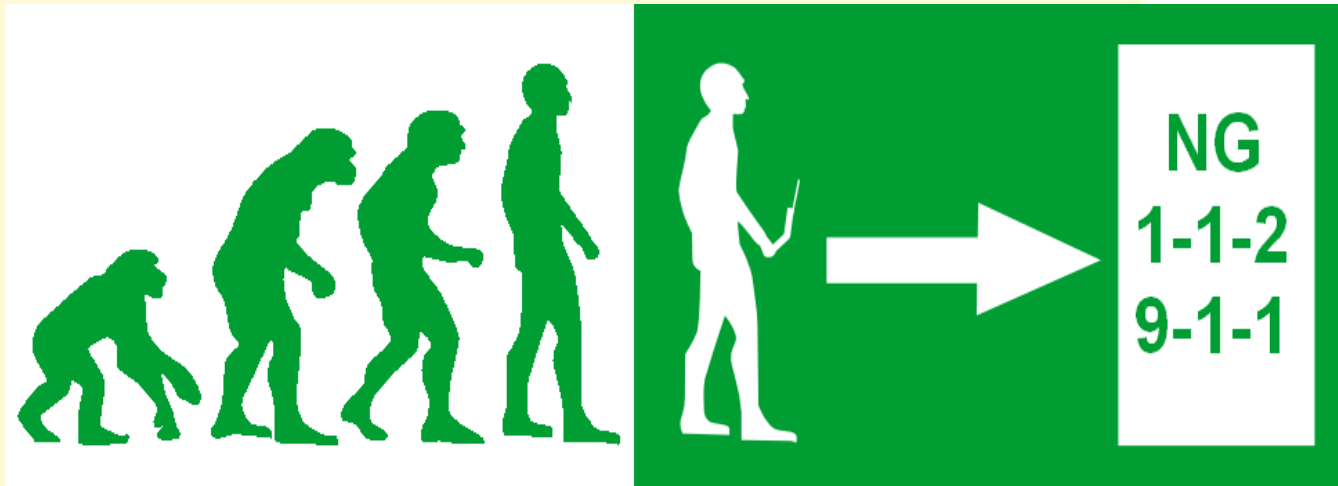

Get informed about the process going on

*Do the next steps towards **NG-112***
